-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 2 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Specification*

1. A substitute specification without the claims is required pursuant to 37 CFR 1.125(a) because the current substitute specification is incomplete and there is no statement that it contains no new matter. During faxing or scanning, parts of pages 2, 3, 8 and 13 of the clean copy were cut off. The examiner was able to examine the application by piecing together the clean and marked-up copies. Also, it is unclear why the paragraph numbering on the clean copy begins with [0071]. This could cause confusion if any amendments are needed in the future.

A substitute specification must not contain new matter. The substitute specification must be submitted with markings showing all the changes relative to the immediate prior version of the specification of record. The text of any added subject matter must be shown by underlining the added text. The text of any deleted matter must be shown by strike-through except that double brackets placed before and after the deleted characters may be used to show deletion of five or fewer consecutive characters. The text of any deleted subject matter must be shown by being placed within double brackets if strike-through cannot be easily perceived. An accompanying clean version (without markings) and a statement that the substitute specification contains no new matter must also be supplied. Numbering the paragraphs of the specification of record is not considered a change that must be shown.

2. The disclosure is objected to because of the following informalities: The references to specific claim numbers (paragraphs 86 and 87 of the clean substitute specification) should be removed because the claim numbering changes at issue.

Appropriate correction is required.

***Allowable Subject Matter***

3. Claims 8-21 are allowed.
4. The following is an examiner's statement of reasons for allowance: The closest prior art to Flink et al. (4,480,393) fails to disclose the novel limitation that the vaporized cryogenic fluid is fed into the recirculation stream of inert gas, and that the cryogenic fluid is liquid nitrogen, in combination with the other recited steps.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Conclusion***

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The references listed on the attached PTO-892 form disclose gas separation and recovery systems.

6. This application is in condition for allowance except for the following formal matters:  
The objections to the specification detailed in paragraphs 1 and 2 above.

Prosecution on the merits is closed in accordance with the practice under *Ex parte* Quayle, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
